(True Copy of the Electrical Engineer's Note dated 22-9-'36)

In our Booklet of Conditions, rates etc., for the supply of electric energy to consumers, no specific tariff has been fixed under part 11 of the same for different classes of pumping such as domestic, industrial and Agricultural. The definitions of these three classifications of pumping have been clearly defined by the Chief Engineer for electricity in his letter NO. 900/30-G2 dated 28-8-'36,

In view of the above, I recommend for consideration and approval the following tariffs to be adopted for the three classes of pumping.

PUMPING:- Domestic, Industrial or Agricultural- between the hours of 10 P.M' to 6 P.M.

|---|---|---|---|
| First | 2,000 units per mensem, .... | | Rs. 0- 2- 0 a un |

The Commissioner, Hospet Municipality,

was advised in my letter No.9620/36-G-4 dated 2.12.36 to adopt the following two new rates in lieu of that proposed by him in his letter to Government, E.C.R.No. 36/35 dated 7.11.36:-

" I. "Refrigerators, small cookers, heaters and pumps, sewing and washing machines and motors upto 3 horse power and other small appliances for domestic purposes when metered on a separate circuit - At 2 annas per unit with a minimum of Rs.3/- per month per service.

Where pumps or other equipments having motors of 3 horse power or over are used on domestic premises and on a separate circuit they may be classed as industrial load and charged accordingly

This may be included as item (c) under tariff (1).

power at 400 volts for bona fide agriculturists having not less than 3 horse power connected - 1.5 annas per unit. No minimum charge but annual guaranteed consumption of power shall not be less than Rs.15/- per horse power connected, otherwise balance will have to be paid. This rate will also be applicable to bonafide cottage industries irrespective of the horse power connected."

This may be incorporated as item 2(b the existing clause 2 being renumbered as 2 (a).

As regards the security deposit the amounts proposed by the Council are very high. The Commissioner was therefore informed that it is better not to have a fixed scale of deposit as the consumption will vary according to industry or work and that a charge calculated on two months' estimated consumption and with consideration of the integrity of the individual consumer may be made by the Counci

These rates and my suggestion regarding security deposit have been accepted by the Municipal Council - vide copy of the Commissioner's letter and the resolution of the Council enclosed - and may be approved.
